

2011 CPD annual survey

The Institute carried out the 2nd annual survey to voting members in February 2011 to gain feedback on members' understanding of their CPD requirements and the activities undertaken.

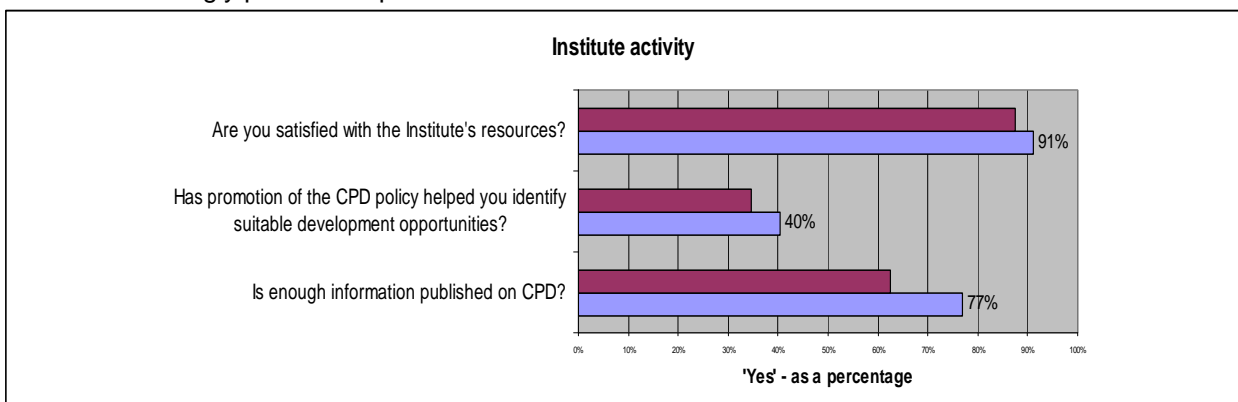

991 responses were received from the 2010 survey and 775 from the 2011 survey.

The results indicated that members' appreciation of the CPD requirements had increased since the launch of the formal policy in spring 2009. The chart below shows the 2010 data for each response followed by the 2011 data:

The survey also asked if members had used the [Online CPD tool](#), which enables members to analyse their professional development needs. More members had used the tool in the last year, 46% compared to 35%, and of those who had used the tool, 62% found it to be effective.

Members were also asked about the Institute's activity on CPD, which again revealed increasingly positive responses:
